

Institute for Analytical Philately, Inc.

FOURTH INTERNATIONAL SYMPOSIUM ON ANALYTICAL METHODS IN PHILATELY

The Smithsonian National Postal Museum

13–14 November 2020, Washington, DC

The Institute for Analytical Philately and the National Postal Museum invite you join us for a two-day review of the latest advances in technical studies of postage stamps. Featured will be an international group of speakers considered leaders in their fields. The format will allow plenty of time for questions and informal discussion. A registration form is attached.

Scheduled Presentations

Brinkley, Daniel	Energy Dispersive Spectroscopy of Stamp Inks
Brittain, Harry	Evolution of the Ink and Paper Composition in the Stamps of the 1893 Columbian Issues
Charles, Harry	1894 and 1895 Series First Bureau Postage Dues : Color, Fluorescence, and Early Use
Hisey, Bob	Color in Philately Using Scanner Data
Hofmeyr, Jannie	Quantitative Color Analyses of U.S. 3-Cents 1861 Issues
Judge, Richard	Philatelic Applications of Wavelength Resolved Fluorescence
Lyons, Larry	Using the XRF in the Expertizing Process
Mustacich, Bob	Computer Analysis of Die-Cut Stamp Edges
Shugar, Aaron	Handheld Macro-XRF scanning: Development of Collimators for Sub-mm Resolution
Yangchen, Lin	Microscopic Structure of Stamp Paper Fibers and Surfaces

Pre-Registration is required

Each delegate will receive a copy of the bound proceedings volume with full texts of presentations.

Lunch will be provided.

Please pre-register early, as seating will be limited. See attached form.
